

Agenda

Evaluation of the Municipal and Domestic Supply (MUN) Beneficial Use in Agriculturally Dominated Surface Water Bodies

Friday November 13, 2015

10:00 AM -12:00 PM

Location: Central Valley Regional Water Quality Control Board Office, 11020 Sun Center Drive, Suite 200
Rancho Cordova, CA 95670, Delta Meeting Room

Conference Line: Toll Free: 1-877-960-0556
Attendee access code: 684 569 3

Goal of Meeting: Discuss the process for evaluating controlled recirculating systems, as part of the proposed Basin Plan Amendment to establish a region-wide MUN evaluation process in Ag dominated surface water bodies.

1. Background and review of controlled recirculating systems
 - a. Year-round closed recirculating system
 - i. Example – Tulare Lake Basin
 - b. Seasonally-closed recirculating system
 - i. Historic use - Sacramento rice production
 - ii. Current and potential future use
2. Review Application Templates – criteria and outline
 - a. Do we have the right criteria questions? Are there additional questions that should be added?
 - b. Does the outline adequately cover the information that is needed to evaluate a controlled recirculation system operation and ensure it meets the criteria? If not, what are we missing?
 - c. What type of coordination is needed with both internal and external programs to address emergency discharges and the potential risks to downstream beneficial uses? Should there be specific monitoring and notification requirements?
 - d. What type of coordination is needed on an ongoing basis to address potential changes in management practices?
 - e. What type of process is needed for the overall review and approval of these applications?
3. Wrap-up
 - a. Are there any other overarching issues or policy decisions that need to be addressed?
 - b. Next Steps
